

# Aliz Intelligence Platform

supercharged by **alizi**

**EXTEND YOUR TECH CAPABILITIES** and **TRANSLATE THEM INTO BUSINESS COMPETENCIES** in the field of AI/ML technologies, data analytics and cloud operations.

**WE PROVIDE SOLUTIONS** that are not just building blocks; but pre-assembled tech capabilities deployed in a microservice architecture.

It supports all commodity features required to maintain and operate microservice clusters efficiently. Guided by a cloud-native ecosystem, we transform solutions into composable business capabilities enabling a Composable Enterprise.

The platform applies better understanding of different aspects of your data. We have perfected a collection of **BEST PRACTICES FOR YOU!**

[Give it a try!](#)

### Blueprints

Pre-populated development projects made available in your repository with source code.

### Commodity features

Managed services for MLOps, cloud infrastructure, compliance and QA monitoring.

### Industry-specific AI

Managed services and licensed products for various industries, optimized for specific use cases.

We are a **BENCHMARK MICROSERVICE ENVIRONMENT** that accelerates your businesses' core solutions. Our open-source and monitoring features design a fully transparent and sustainable system in the field of compliance and data governance.

### Packaged capabilities

Microservices packaged in business capabilities

### Seamless operations

Managed microservice architecture to get your business competency to the market within desired ROI.

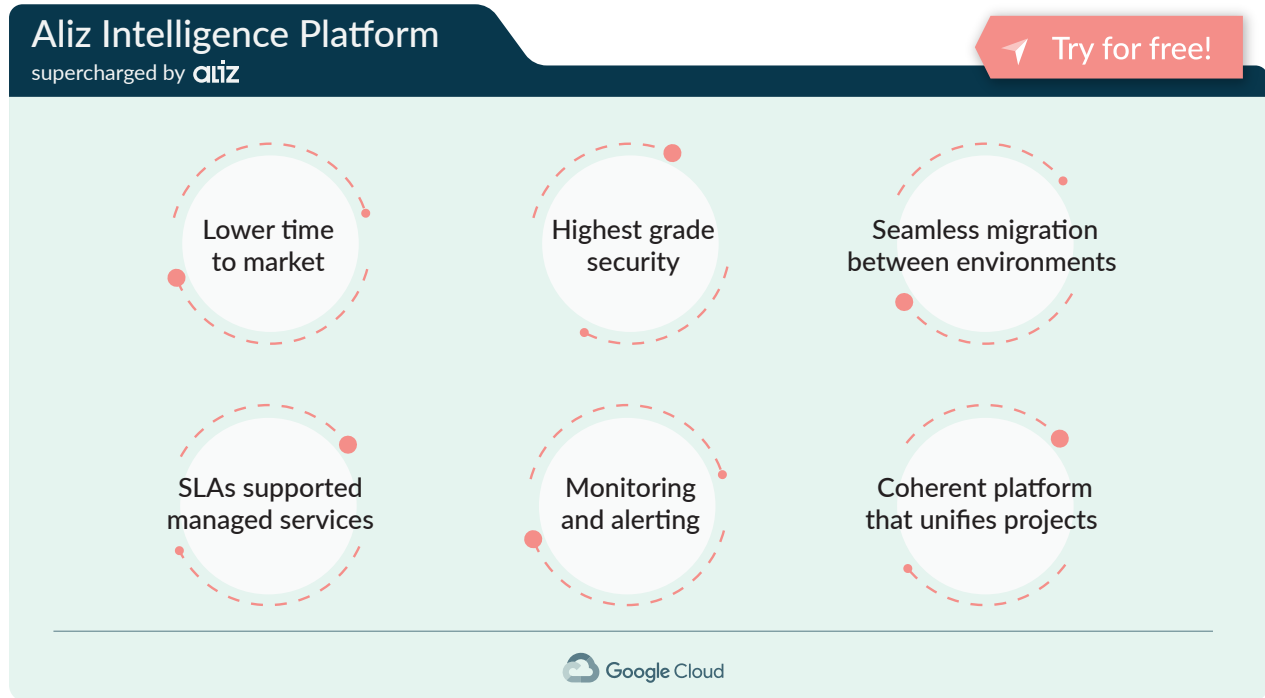

### Cloud native deployment

Deployment and provisioning optimized for Google Cloud.

**WE INTEGRATE** our best breed tools into an easy-to-use platform.

Our blueprints are ready-made solutions and template projects. All components automatically deployed into Google Cloud Platforms. In short: it's where your data complexity becomes clear.

You only need to inject and configure!

**Aliz Intelligence Platform**

- Lower time to market
- Highest grade security
- Seamless migration between environments
- SLAs supported managed services
- Monitoring and alerting
- Coherent platform that unifies projects

Google Cloud

**WE ARE ON A MISSION** to tie together solutions to support the transformation towards a Composable Enterprise which is ready to respond to consumer needs and tech challenges without risking inefficient ROI.

- By building a variety of business solution libraries leveraging machine learning, data science, AI and cloud based technologies.
- By creating managed commodity features that solve integration, maintenance and operation within the organization.
